

## Guidelines for Assignment 2 report

Task C – up to 1 page

Task D – up to 3 pages

Can combine into one pdf for submission.

In the report, focus on explaining your approaches to the tasks, what is your rationale and justification for the final approach choices.

For each task, we will focus on the following when assessing them:

- Did the report explain what the final approach is?
- What was the justification and rationale for this approach? This can be a combination of both explanation and empirical evidence, via experiments.
- (optional, but can be useful for task D) Were alternatives considered? Were comparisons made, and perhaps empirical comparisons conducted?
- Does the described approach reflect the implemented method?
- For task D, how innovative is the solution? Does it extend beyond task B and C, and if not, was there enough and reasonable justification for not doing so?

We will also focus on the quality and clarity of the report. Please try to make it readable. We will focus on criteria such as structure, flow and readability/clarity, which includes figures been readable, axes labelled etc.
